SymphoTouch

In a globally connected world, remote accessibility via your mobile device has become a standard procedure. The brand new SymphoTouch APP for Sympholight offers you this exact function. Access and control of lighting installations created with Sympholight has never before been as quick and easy! In a nutshell, this is a great way of controlling location-based lighting from any of your smart devices.

SymphoTouch displays and stores up to four connections (correspondent ActionPads) which you can access to interact with the luminaires and lighting designs. The cherry on top: each design is assigned a QR code which makes the interaction even easier, end user-friendly and certainly more fun!

- Location based lighting control via your Smart Device
- Runs on both iOS and Android
- Optimized for smartphones and tablets
- Download for free from your AppStore or GooglePlay
- Access Sympholight remotely via Smart Device
- Create a luminaire or design installation in Sympholight, scan the generated QR code to access your lighting design via ActionPad
- QR code grants access and right to control interface for your location-based design
- Store up to four ActionPad connections
- Password protection available, i.e for use in public spaces like fairs or hotels
