traxoncue
AN OSRAM BUSINESS

Traxoncue is a solutions company. We are happy to provide whatever information and documentation is needed to clarify the system design and deepen understanding of our products. Please know, however, that our expertise is limited to our products only. Traxoncue and its employees cannot be held responsible for decisions relating to fixture layout, lighting design, and/or electrical engineering. Traxoncue products are designed to be installed by professionals and are not intended for DIY installation. Traxoncue products are not toys. They are merely stagepieces. They must be reviewed by qualified professionals and incorporated into the construction documents of each relevant discipline.
Traxoncue offers a wide variety of customization options for our products. Any customization requests must be reviewed and approved by Traxoncue before being included on our quotations. As part of this service, a representative of Traxoncue will ensure that our system is connected and configured correctly, and that all Traxoncue components are functioning together properly. Traxoncue is not responsible for any damage caused by improper installation of our products. Any damaged or missing components must be reported to Traxoncue within 5 days of receipt. It is the responsibility of the installing contractor to install all fixtures and control equipment in its intended location and to make all wire terminations. The installing contractor is also responsible for making any necessary adjustments to mounting and/or wiring as determined by the Electrician of Record and/or Traxoncue. Traxoncue does not provide pre-rigging or pre-mounting of fixtures as part of its standard service. Any pre-rigging or pre-mounting requests must be reviewed and approved by Traxoncue before being included on our quotations.
Traxoncue is not responsible for content (e.g. videos or lighting cues) unless it is specifically agreed upon and listed separately from standard system commissioning services in the project quotation.

© 2010 Traxon Technologies

Traxoncue is happy to support your team in every way we can, and we look forward to a beautiful and successful installation.
