Traxon cue is a solutions company. We are happy to provide whatever information and documentation is needed to clarify the system design and deepen understanding of our products. Please know, however, that our expertise is limited to our products only. Traxon cue and its employees cannot be held responsible for decisions relating to a future layout, lighting design, or the aesthetic appeal of a project. Traxon cue products are designed to be installed by professionals who are familiar with the safe installation of low voltage lighting products. They are merely ingredients. They must be reviewed by qualified professionals and incorporated into the construction documents of each relevant discipline.
Traxon cue is not responsible for the installation of its products. Traxon cue will provide a detailed installation manual with each order and is available for consultation as needed. As part of this service, a representative of Traxon cue will ensure that our system is connected and configured correctly, and that all Traxon cue components are functioning together properly. Unless otherwise specified in writing, it is the responsibility of the installing contractor to install all fixtures and control equipment in its intended location and to make all wire terminations. The installing contractor is also responsible for making any necessary adjustments to mounting and/or wiring as determined by the Electrician of Record and/or Traxon cue. Traxon cue does not provide pre-rigging or pre-mounting of fixtures as part of its standard scope of work. Any pre-rigging or pre-mounting services must be specifically agreed upon and listed separately from standard system commissioning services in the project specifications.
Traxon cue is not responsible for content (e.g. videos or lighting cues) unless it is specifically agreed upon and listed separately from standard system commissioning services in the project specifications.
Traxon cue is happy to support your team in every way we can, and we look forward to a beautiful and successful installation.
