Orientation and Color Mixing

For left or right viewing angles, align the boards left to right or right to left.

"Snake Mode"

OR

Main movement pattern

For top or bottom viewing angles, align the boards top to bottom or bottom to top.

"Snake Mode"

OR

Main movement pattern

- For best color mixing results, ensure the boards have the same orientation and remain parallel to the main movement pattern of the veiwer.
- If same orientation cannot be achieved, ensure the orientation of the boards that snake back are 180° to the previous row / column and consider the main movement pattern of the viewer.
