<p>Traxonec is a solutions company. We are happy to provide whatever information and documentation is needed to clarify the system design and deepen understanding of our products. Please know, however, that our expertise is limited to our products only. Traxonec and its employees cannot be held responsible for decisions relating to fire alarm system, lighting design, they are merely suggestions. They must be reviewed by qualified professionals and incorporated into the construction documents of such relevant discipline.</p> <p>As part of this service, we warrant that all Traxonec items we provide are new, conform to the applicable code requirements and are free from defects in materials and workmanship. We warrant that the system is complete and configured correctly, and that all Traxonec components are functioning together properly.</p> <p>Declining the system commissioning services absolves Traxonec of any and all responsibility for the functioning of the finished system beyond the standard product warranty. It is the responsibility of the client to ensure that the system is installed and configured correctly and that the system is tested and accepted by the client. Traxonec is not responsible for making any necessary adjustments to mounting and/or wiring as determined by the client or by Traxonec. Traxonec does not provide pre-approval or pre-mounting of fixtures as part of its services, and cannot accurately quote third-party materials required for mounting/installation.</p> <p>Traxonec is not responsible for conflict (e.g. actions or lighting control) unless it is specifically agreed upon and listed separately from standard system commissioning services in the project quotation.</p> <p>Traxonec is happy to support your team in every way we can, and we look forward to a beautiful and successful installation.</p> <p>© 2015 Traxonec Technologies</p>
