

Lighting Control Engine 4

Lighting Control Engine 4

The Lighting Control Engine 4 (LCE4) serves as a high-performance server for controlling large lighting projects, with pre-installed e:cue SYMPHOLIGHT and Lighting Application Suite (LAS). As a central control unit, this versatile light control server orchestrates all devices and lights within a project. The LCE4 supports a wide range of Ethernet-based protocols. Shows and light scenes can be controlled with the internal web server via mobile devices, web browsers or via cloud applications. The LCE4 is the ultimate server solution for any demanding lighting project.
