Symplolink

TRAXON | e:cue

MEMBER OF PROSPERITY GROUP

1995 — traxon — Founded in Frankfurt, Germany

2001 — e:cue LIGHTING CONTROL — Founded in Paderborn, Germany

2002 — Traxon switch to professional architectural lighting

2003 — Traxon HQ moved to Hong Kong

2006 — Traxon becomes an e:cue shareholder

2008 — traxon | e:cue — Formed a global entity

2009 - 2011 — OSRAM — Acquired Traxon e:cue

2022 — TRAXON | e:cue MEMBER OF PROSPERITY GROUP

Full Spectrum Lighting Management System

Circular Sustainability

Our Full Spectrum of Lighting Management Systems

Symposium

Sympholink

A smart general lighting management system for indoor applications, built for future smart buildings.

Symposium

A powerful outdoor lighting management system designed to control dynamic façade and architectural illumination with precision and efficiency.

Symphocity

A comprehensive smart management platform provides deep insight and control over all Sympholight projects and future Sympholink projects.

Our Full Spectrum of Lighting Management Systems

Symposium

Sympholink

A smart general lighting management system for indoor applications, built for future smart buildings.

Sympholight

A façade lighting management system designed to control dynamic architectural lighting projects.

Symphocity

A comprehensive smart management platform provides deep insight and control over all Sympholight projects and future Sympholink projects.

Sympholink Introduction

Why Symposlink

Symposlink is a smart general lighting management system built for next-generation buildings.

Value Creation:

Data-Driven Lighting for Smarter Buildings

One System for Every Scale and Space

Symposlink

Why Symposlink

Data-Driven Lighting for Smarter Buildings

Supports DALI-2 & D4i standards over both wired and wireless connections, enabling real-time data transmission and future-proof integration.

Symposlink

What is D4i?

Data for Enhanced Asset Management & Performance Monitoring

- D4i (DALI for Intelligent) is an extension of DALI-2 certification.
- D4i enables DALI Inside intelligent, IoT-ready luminaires.
- All D4i LED drivers provide luminaire, energy & diagnostics data.

Part 251 – Luminaire Data

Part 252 – Energy Reporting

Part 253 – Diagnostics & Maintenance

Why Symposlink

Data-Driven Lighting for Smarter Buildings

Symposlink

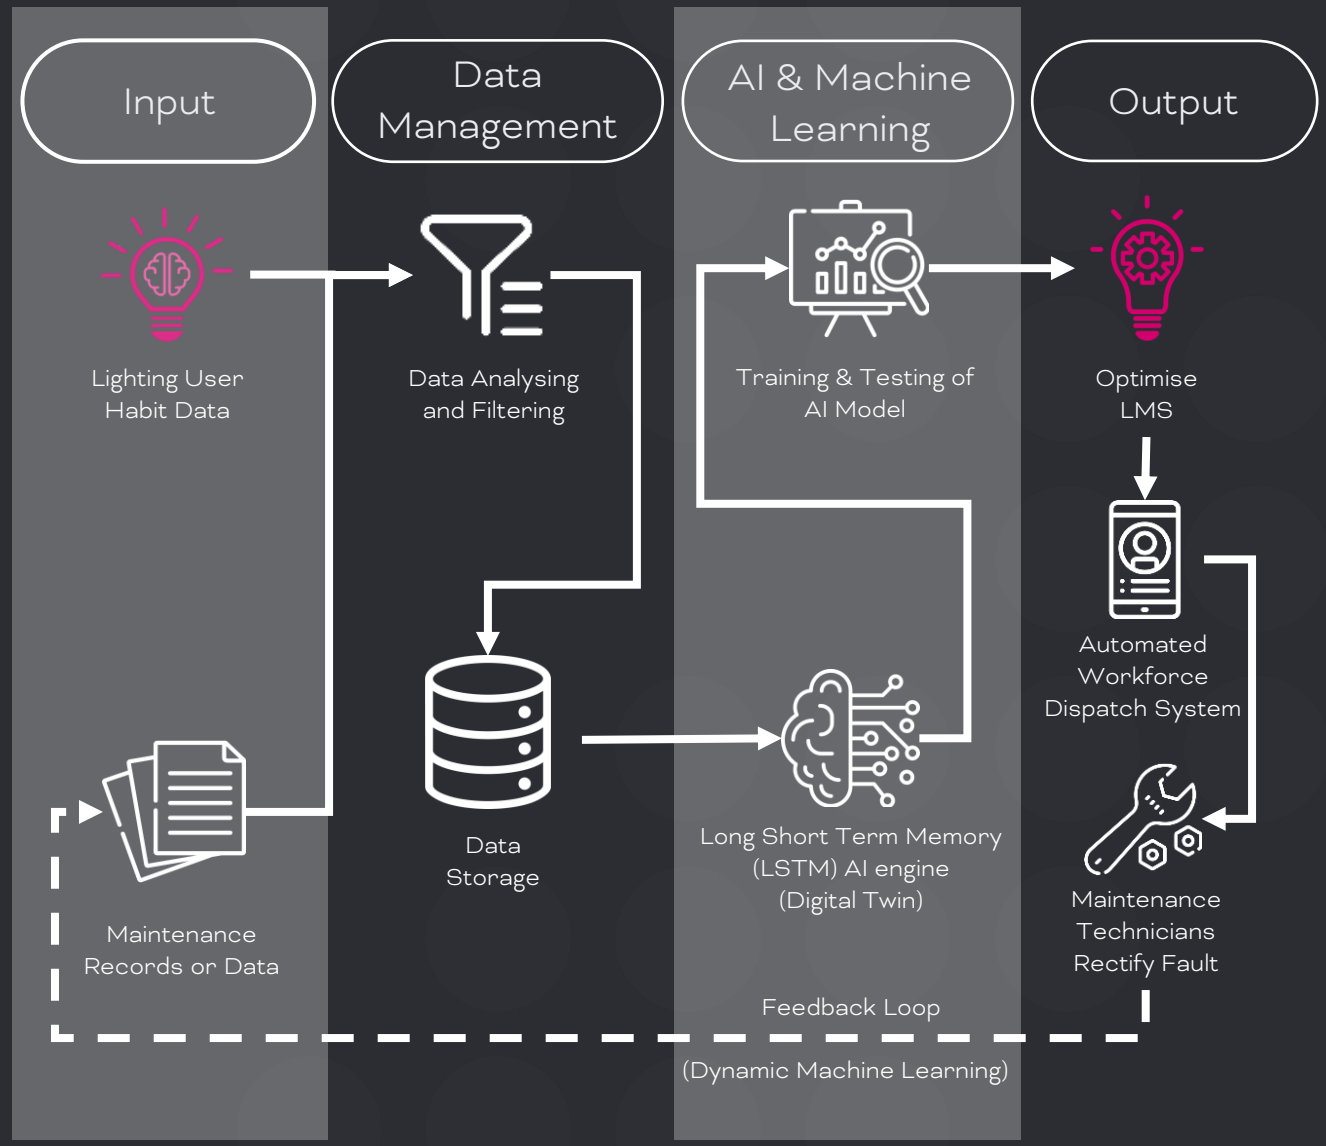
Lighting is everywhere in the facility, and with a comprehensive range of sensors tailored for diverse applications, it enables seamless data flow and system-wide optimization from every angle

Why Symposlink

Data-Driven Lighting for Smarter Buildings

An IoT-ready architecture connects effortlessly with third-party systems via open API, unlocking full scalability and future AI integration.

Symposlink



Why Symposlink

Symposlink

One System for Every Scale and Space

Symposlink adapts to any scale, it ensures efficient management across your entire project.

Small Scale

Manage lighting in a single office

Medium Scale

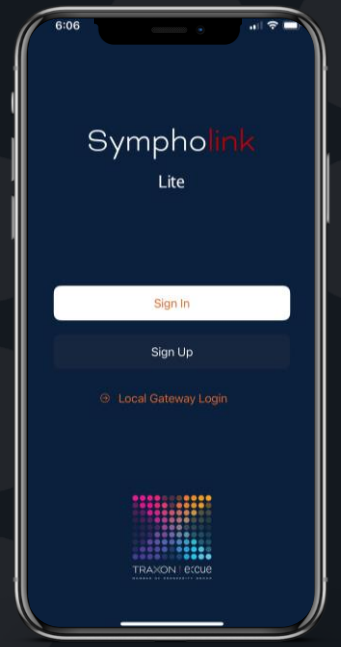
Manage lighting in a single building

Large Scale

Manage lighting within multiple buildings

Symposlink Lite

- Zigbee Wireless Connectivity
- App-Based Control & Monitoring
- Easy upgrade to Symposlink system
- Full Hardware Reusability



Why Symposlink

Symposlink

One System for Every Scale and Space

Symposlink adapts to any scale, it ensures efficient management across your entire project.

Small Scale

Manage lighting in a single office

Medium Scale

Manage lighting in a single building

Large Scale

Manage lighting within multiple buildings

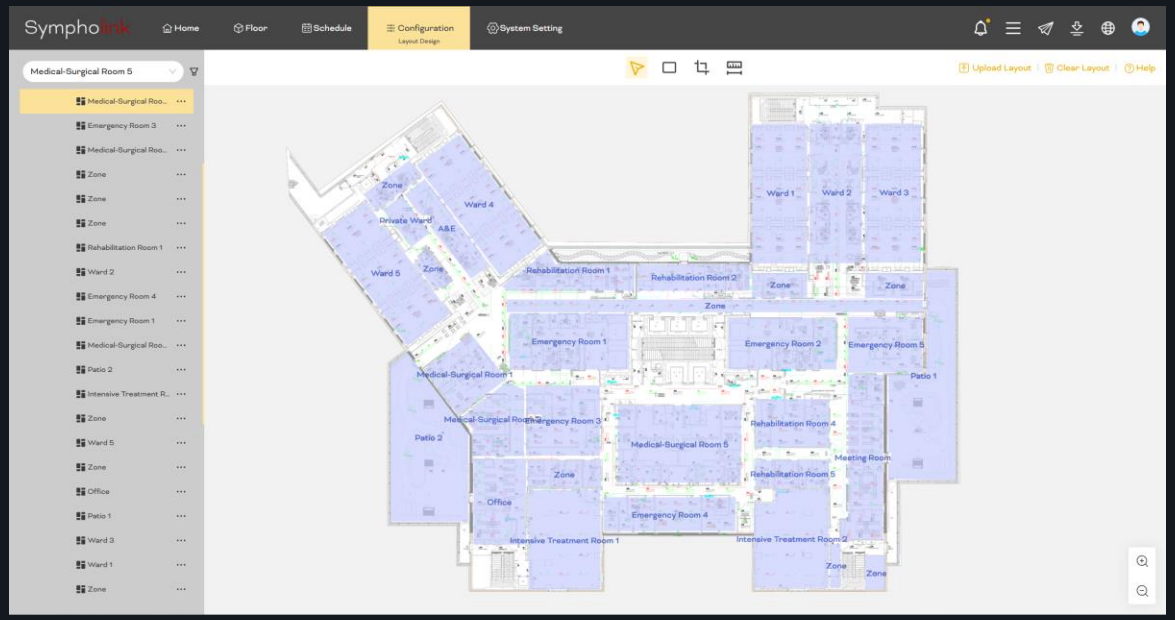
Key Features | Smart & Friendly Interface



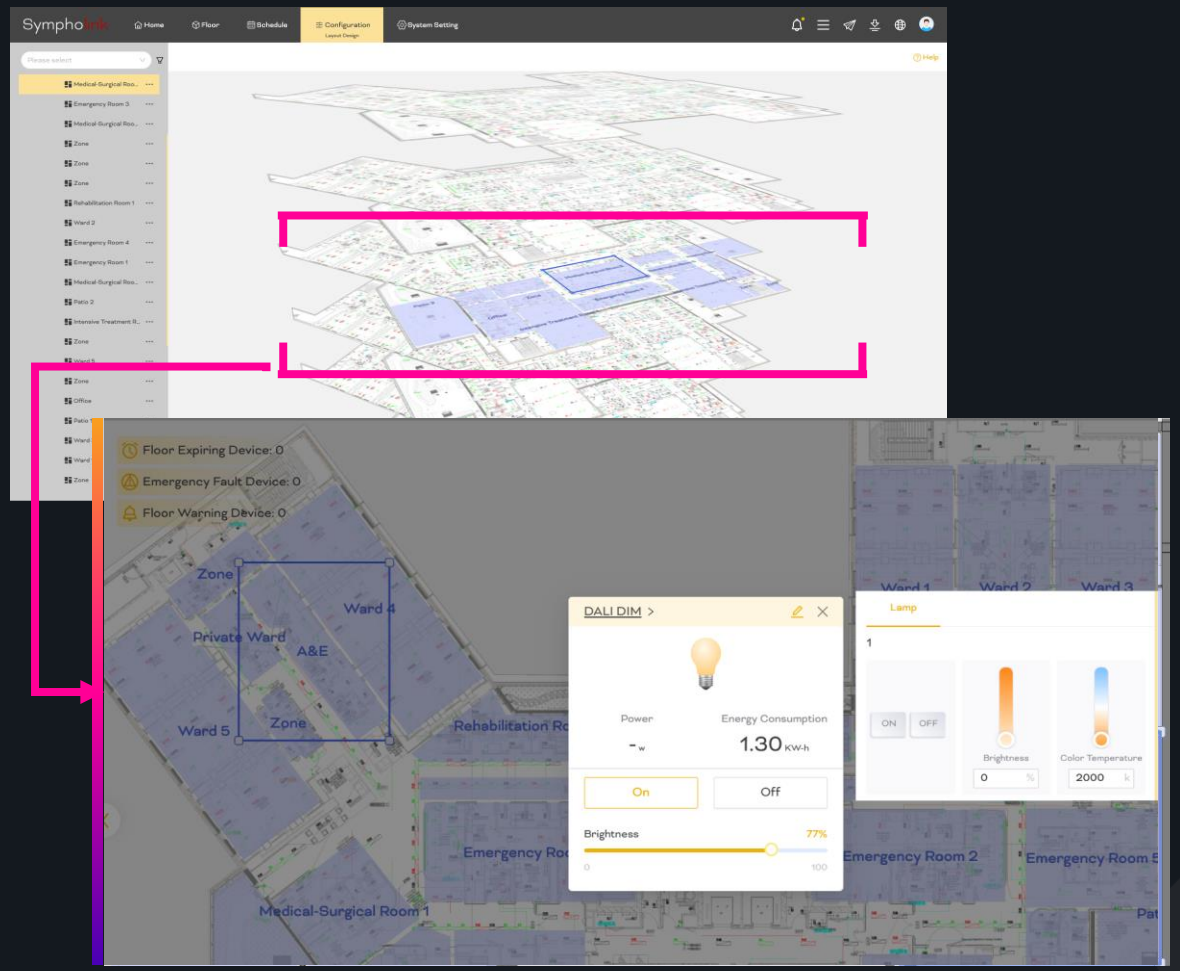
Smart Floor Plan Integration for Efficient Device Setup

- Effortlessly **import** actual floor plans in **CAD**, PDF, JPG, or PNG formats
- Flexibly **drag and drop** function to create layouts and define custom-shaped zones for tailored configurations
- Set scale ratios to ensure accurate, proportional placement of devices based on the physical environment

Symphonlink

Key Features | Smart & Friendly Interface

Symposlink



Centralized Device Management for Seamless Control

- **Real-time status** display for comprehensive oversight.
- Instant alerts for any equipment abnormalities within designated areas.
- Customized control and management for each zone's specific needs.

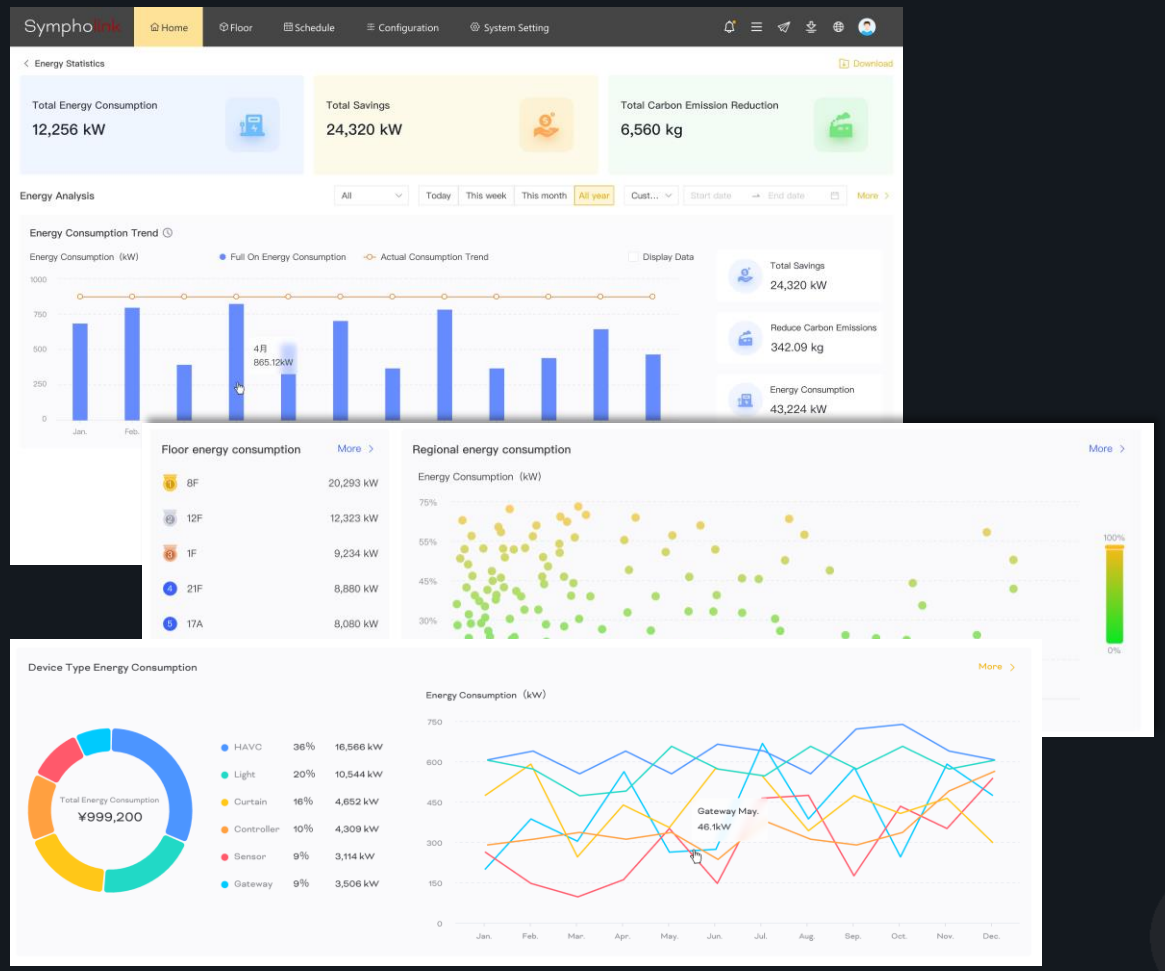
- Space Utilization Statistics

Prompt Technical Support

Scalable System Design

Key Features | Insightful Energy Dashboard

Symplolink



Energy Consumption Statistics

- System Energy Consumption Statistics:
  - View total usage, savings, and carbon reduction.
- Floor Energy Consumption Statistics:
  - Monitor consumption by floor.
- Energy Analysis:
  - Track trends, emissions, peak/valley periods, and equipment efficiency.

Key Features | Insightful Energy Dashboard

Symplolink

Space Utilization Statistics

(Motion Sensor is Required)

- Heat Map
  - Access real-time and historical data on space usage.
- Seamless Navigation
  - View space utilization insights through Floor Monitoring.
- Data-Driven Optimization
  - Analyse trends to enhance efficiency and resource allocation.
