

## Pixel Dot Go Mounting Guide

### Fixture Dimensions

Unit: mm

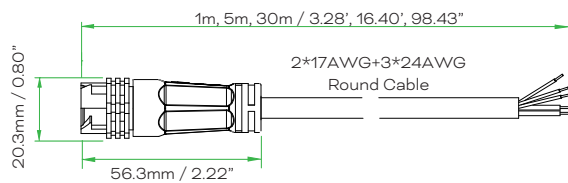

Side cable feed (standard)

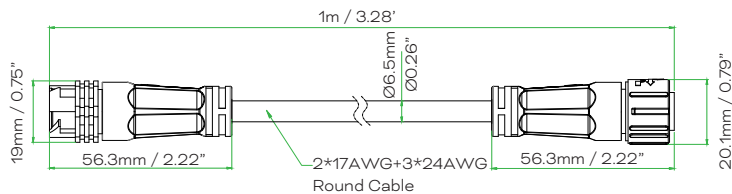

Bottom cable feed (customized)

### Accessories Dimensions

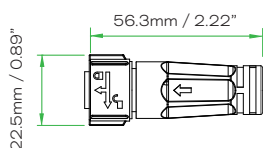

#### Starter Cable

#### Interconnection Cable

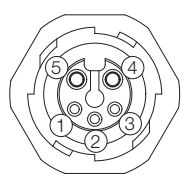

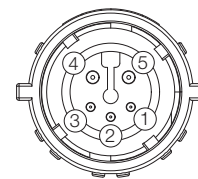

#### End Cap with 120 Ohm Terminator

#### Connector Pin Assignment

##### Input

##### Output

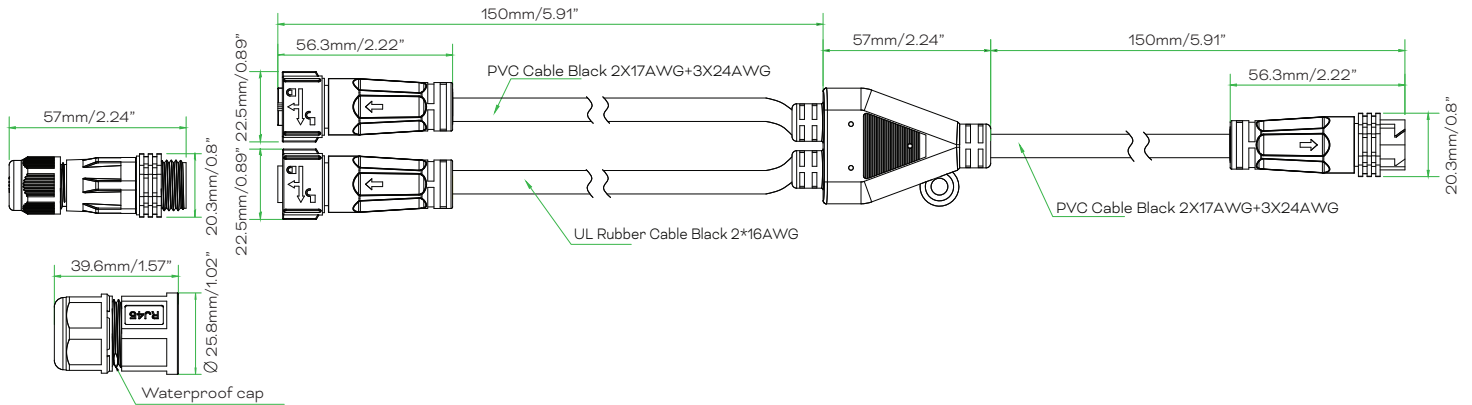

| Wire# | Description | Color  |
|-------|-------------|--------|
| 1     | Data+       | Green  |
| 2     | Address     | Yellow |
| 3     | Data-       | Blue   |
| 4     | DC48V-      | Black  |
| 5     | DC48V+      | Red    |

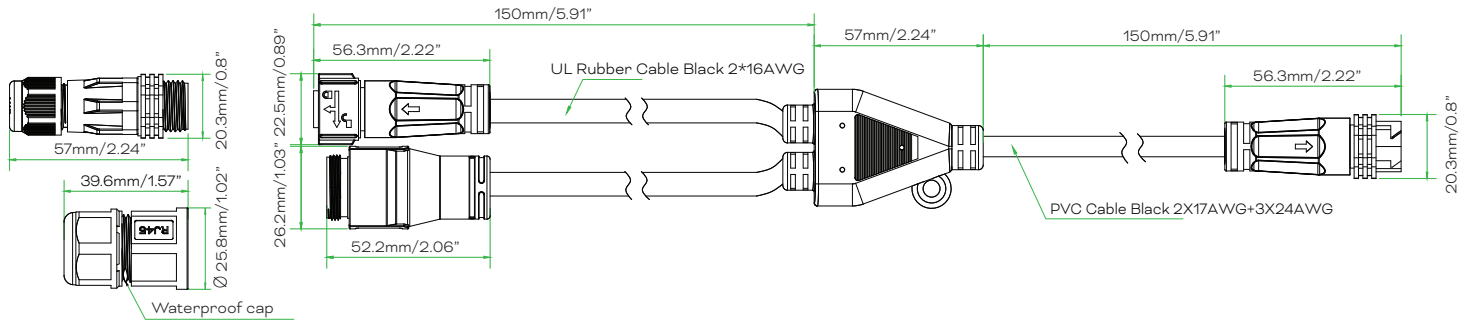

## Accessories Dimensions

### Power Injector Cable Kit (Connector included)

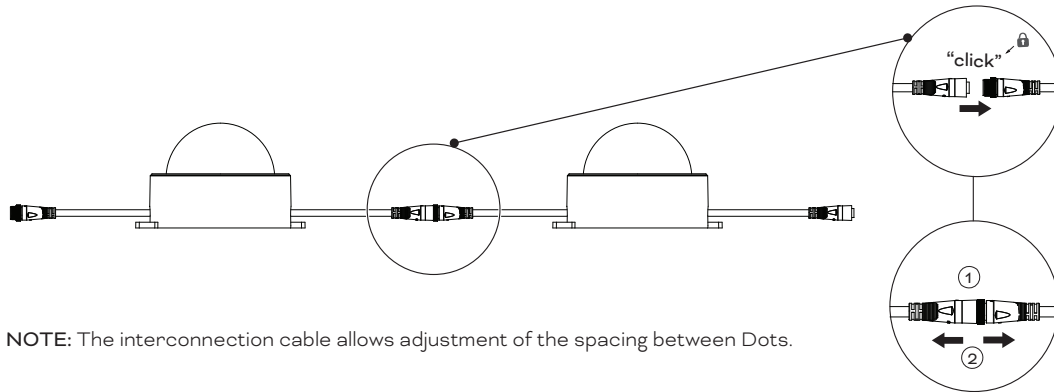

### RJ45 Power Injector Cable Kit (Connector included)

## Mounting

### Cable Connection

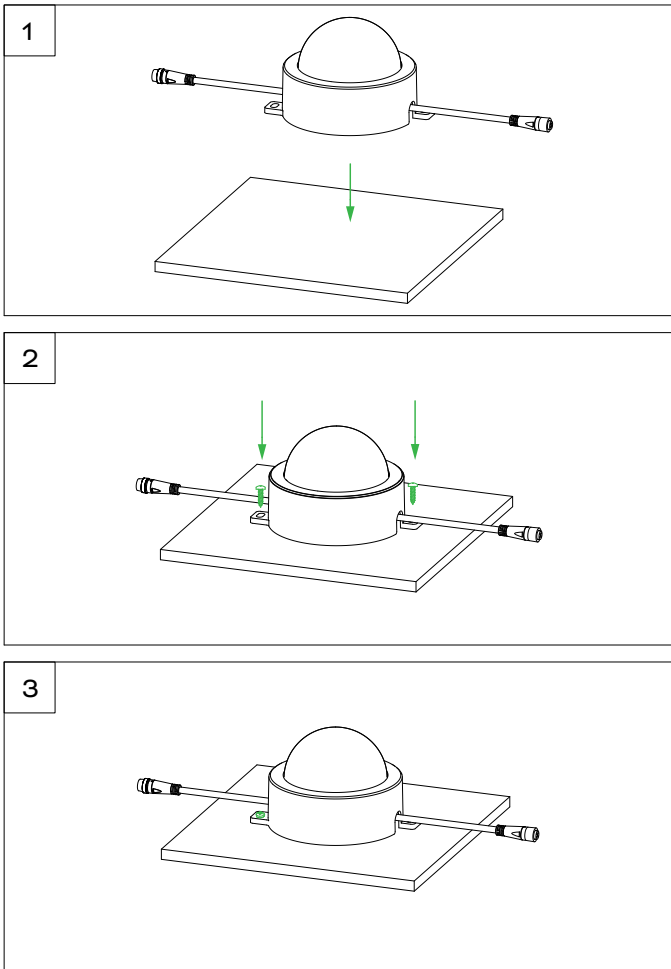

NOTE: The interconnection cable allows adjustment of the spacing between Dots.

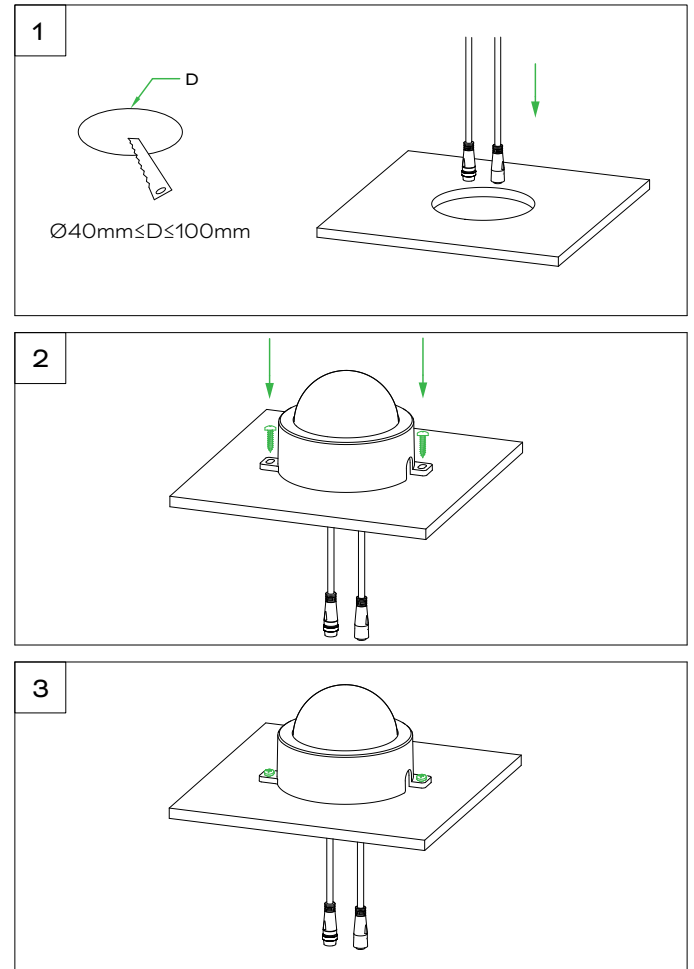

If you do not hear “click”, rotate the spring loaded lock nut manually to lock the connectors and ensure that they are properly mated to protect from water ingress.

### Dot Mounting

#### Surface Mounting

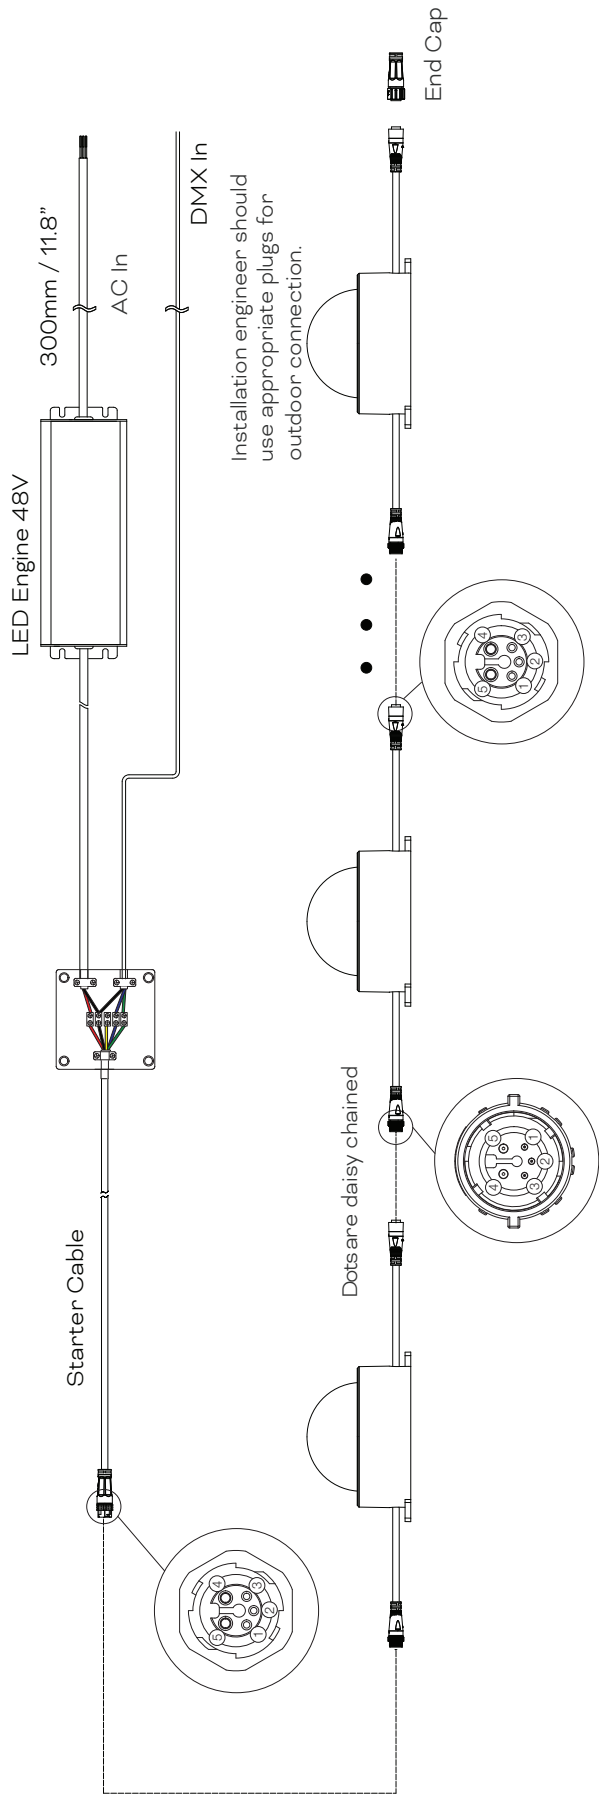

#### Surface Mounting (Wire Hidden)

System Diagram

| Pin# | Signal         | Color  | Connection     |
|------|----------------|--------|----------------|
| 5    | DC48V+         | Red    | DC48V+         |
| 4    | DC48V- and GND | Black  | DC48V- and GND |
| 1    | DMX+           | Green  | DMX+           |
| 3    | DMX-           | Blue   | DMX-           |
| 2    | Address        | Yellow | Do not connect |

The Address wire only need to be connected during address configuration, it is not needed during operation. This wiring diagram shows only typical connections. Actual wiring depends on Dots configuration and installation. Actual no. vary according to cable lengths and signal source. Please consult your local Traxon office for aid.

DO NOT PERFORM LIVE-LINE WORK!

|    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
